

# TC200 • TC224

Thermal Section Doors

With a proven track record for thermal efficiency and extreme durability, the Raynor TC Series is simply the best you can specify. With expanded polystyrene insulation thermally bonded between two steel skins, the TC200 and TC224 models are ideal for dock doors with their exceptional strength and high R-value.

**TC200**  
TC200's two-sided, impact resistant, steel design features a laminated core of expanded polystyrene insulation. TC200 is offered with a number of exterior color selections and optional windows to meet your application's needs.

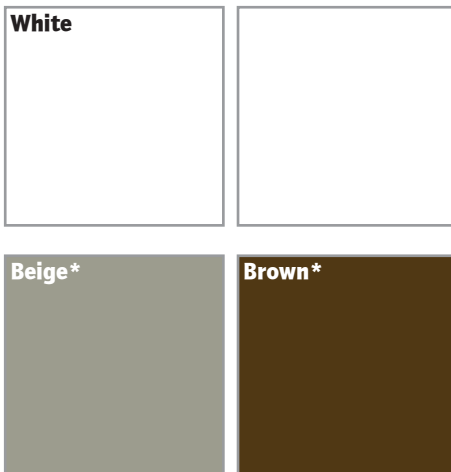

**TC224**  
The TC224 offers all of the same features and benefits as the TC200 but gives you a thicker 24-gauge exterior skin. Available in white and brown, this dynamic polystyrene sectional door is a perfect solution for dock or warehouse installations.

# TC200

TC200's 2" thick door sections are made from high-strength, impact-resistant steel with a thermal core of polystyrene insulation for a 10.25 R-value. The Raynor TC200 thermal sectional door is offered with a number of exterior color selections and optional windows to meet the needs of your commercial application.
